ACI has become the First Certification Body to achieve The International Accreditation Service (IAS) accreditation (U.S.A.) to certify companies to all ISO 22000, ISO 27001, ISO 13485, ISO 41001, and ISO 55001 Certifications,

Accredited Certification International Limited (ACI) is pleased to announce the achievement of Accreditation granted by the International Accreditation Service (IAS) for **ISO 22000 Food Safety Management System (FSMS)**, **ISO 27001 Information Security Management System (ISMS)**, **ISO 13485 Medical Devices – Quality Management System (MDMS)**, **ISO 41001 Facility Management –Management System (FMMS)** and **ISO 55001 Asset Management System (AMS) Certification.**

RTTP

Reindustrialisation and Technology
Training Programme

The International Accreditation Service (IAS) is a nonprofit and official organization which found in the United States that has been providing accreditation services since 1975. IAS accredits a wide range of companies and organizations including governmental entities, commercial businesses, and professional associations. IAS is a subsidiary of the International Code Council (ICC), a leader in building safety. ICC is a professional association that develops the International Building Codes, and is a public authority with members from the Government and industry.

What's more, for **Reindustrialization and Technology Training Programme (RTTP)**, we have ISO 22000 FSMS, ISO 27001 ISMS and ISO 41001 FMMS Pre-approval training courses included [1] Implementation & Documentation, [2] Effective Application and [3] Internal Auditor, that can assist students to acquire more knowledge on these management standards. Any eligible company could apply for RTTP funding in order to receive up to 2/3 course fee reimbursement for each employee. (Remarks: The RTTP Funding for Implementation & Documentation and Effective Application Training for ISO 50001 is in processing.)

Any organizations would like more information about IAS Accredited Certifications may contact our Customer Services department as acics2@aci-limited.com or (o)39778988, and RTTP Pre-approval training may contact our Training department as training@aci-limited.com or (o)39778933 or visit to website: www.aci-limited.com

Besides, **ISO have published two new versions of significant management system standards for ISO 22000 :2018 FSMS and ISO 50001:2018 EnMS.** With these releases, all ISO 22000:2005 certifications shall expire or be withdrawn at the end of the transition period on 29 June 2021. And all ISO 50001:2011 certifications shall expire or be withdrawn at the end of the transition period on 21 August 2021.

ACI provided the services for Development of Quality Assurance and Assessment for Building Information Modelling (BIM) Add-in to EMSD and Glad to offer ISO 19650 Verification Service

Accredited Certification International Limited (ACI) has recently provided the services for Development of Quality Assurance and Assessment on BIM Add-in for Building Energy Code Compliance Checking of Lighting Installation to Electrical and Mechanical Services Department (EMSD). EMSD is actively adopting BIM and other BIM-enabled technologies in E&M engineering.

Building Information Modelling (BIM) is the management of information through the whole life cycle of a built asset, from initial design all the way through to construction, maintaining and finally de-commissioning, through the use of digital Modelling. The key benefit of BIM is to provide a faster and more effective processes for design and construction stage due to the information is more easily shared, can be value-added and reused.

What's more, ISO 19650 is a series of International standards. It defines the collaborative processes for the effective management of information throughout the delivery and operational phase of assets when Building Information Modelling (BIM) is being used. **ACI is glad to offer ISO 19650 verification services for building projects of any scale and complexity using BIM.**

Besides, for **Reindustrialization and Technology Training Programme (RTTP)**, we have **BIM Pre-approval training courses** included [1] Introduction for Project Leader, [2] Practical Basic Level [3] Practitioner (MEP) Intermediate Level [4] Practitioner (Arch& Struct) Intermediate Level, that can assist students to acquire more knowledge on this. Any eligible company could apply for RTTP funding in order to receive up to 2/3 course fee reimbursement for each employee.

Any organizations would like more information about ISO 19650 Verification services may contact our Customer Services department as acics2@aci-limited.com or (o)39778988, and RTTP Pre-approval training may contact our Training department as training@aci-limited.com or (o)39778983 or visit to website: www.aci-limited.com

ACI fully support the 9th annual of 2020 for International Food Safety Association (IFSA)

Focusing on an increasingly important issue – “Food Safety”, International Food Safety Association (IFSA) develops for building food safety awareness among customer and factory. IFSA is designed to ensure and encourage the food safety in the whole food chain. What’s more, the Association provides a platform by together with a depth communication on food safety related matters though training, factories visit and experts’ experience sharing.

In 2020, Accredited Certification International Limited (ACI) fully supports and participates in the 9th Annual of IFSA and thank you for their effort in promoting food safety. ACI, presented as one of the assessment team members for food safety award achievement, the nominees of “Food Safety Outstanding Award” and “Food Safety Prominent Leader Award ” is Treasure Lake Greenfood Kitchen and Hop Lee Agriculture Enterprises Limited respectively. IFSA took a great step by establishing this food safety platform which to address challenges in global food safety.

ACI is leading inspection, verification, assessment, certification and training company, we provide a wide range of services, including gap assessment, professional and strategic training courses, pre-audit, research and survey, etc.

Any organizations would like more information about ACI, may contact our Customer Services department as acics2@aci-limited.com or (o)39778988 or visit to website: www.aci-limited.com.

ACI delivers a FREE Training Course (First come, first served) on ISO 41001 Facility Management -Management System (FMMS)

Accredited Certification International Limited (ACI) is pleased to announce that we would like to offer a Half-Day FREE ISO 41001 Facility Management -Management System (FMMS) Introduction Training for our Valued clients in 12 January 2021 (Tuesday). (First come, first served)

Facility Management (FM) is currently one of the fastest-growing professional and operational disciplines worldwide. The way of managing FM is therefore getting more significant for the sector development financially and operationally.

The Major target of ISO 41001 (FMMS) gives a new way of thinking about effective and efficient delivery of FM services to demand organizations.

The standard is to increase awareness and support the development, implementation and maintenance of effective FM. It also aims to consistently meet the needs of interested parties in a sustainable manner and enables organizations to grow rapidly in this market.

We would like to invite you to join our training, student who is interested in FMMS, for details, may contact our training department as training@aci-limited.com or (o) 39778984 or website: www.aci-limited.com. ACI dedicates to offer professional trainings and certification services to various industries and organizations.

COVID-19 RESPONSE: FREELY AVAILABLE ISO STANDARDS AND CHINESE NATIONAL STANDARDS AND INFORMATION

ISO and a number of national standards bodies have made available to society, free of charge, technical standards supporting the fight against the COVID-19 pandemic. These include standards related to the manufacture and acquisition of medical devices identified as priorities for use in health services and various sectors. They also include a number of well-known management system standards to support global efforts in dealing with the COVID-19 crisis.

A full list of the standards is freely available in read-only format from ISO website at <https://www.iso.org/covid19>

Besides, Standardization Administration of the P.R.C. SAC (China) also provides useful comparisons and links. A full list of the standards available from her website at <http://www.sac.gov.cn/sacen/FAC/>

ISO 21001:2018

Educational Organizations Management Systems (EOMS)

Education is at the forefront of actions that contribute to the society's prosperity. All of us should be concerned with the quality of education delivered by the educators. ISO 21001 Management Systems focuses on educational organizations and their respective services and products, as well as the improvement and/or enhancement of educational services and products. The purpose of the standard is to improve the system and assurance of conformity to the requirement of learners and other beneficiaries.

The requirements of ISO 21001 are generic and intended to be applicable to any organization that uses a curriculum to support the development of competence through teaching, learning or research, regardless of the type, size or method of delivery.

ISO 21001:2018 can be applied to educational organizations within larger organizations whose core business is not education, such as professional training departments.

Benefits:

- ◆ To improves education system
- ◆ To enhance the reputation of educational institution
- ◆ Increased the credibility of the organizations
- ◆ To promote equal opportunity for all students regardless of their religious background, ethnic or cultural origin, gender, ability/ disability
- ◆ To provides personalized training and enhance satisfaction of learners

ICTI Ethical Toy Program

(i) BACKGROUND

The International Council of Toy Industries (ICTI) is the industry association for the worldwide toy industry. The mission of this association is to promote the safety standard of toy, to reduce or eliminate the barriers to trade and to increase the social responsibility for the industry.

The ICTI Ethical Toy Program, which was found by the ICTI in 2004 but now is independent and not-for-profit organization, is the ethical supply chain program for global toy and entertainment industry. Globally over 1,200 factories are Ethical Toy Program Certified in 13 countries.

(ii) THE CONTENT OF ICTI ETHICAL TOY PROGRAM:

- Explain business benefits and opportunities that ICTI certification brings to certified factories;
- Explain the Ethical Toy Program's principle, concept and structure;
- Explain ICTI audit requirements and methodology;
- Interpret the implementation of Ethical Toy Program into daily operations to advance the performance of the business;
- Discussion with reference to requirement checklist

(iii) THE BENEFIT OF ICTI ETHICAL TOY PROGRAM:

- Brings manufacturers, brands, retailers and civil society partners together to monitor, manage and fix social sustainability issues in the toy industry supply chain and to support the well-being of factory worker.
- Increases safety standards for the work environments to ensure workers are treated fairly with respect and dignity and that factories operate ethically.

Course Duration: 1 day

Methodology: Presentation, workgroup discussion and exercise

Business Social Compliance Initiative (BSCI) & Sedex Members Ethical Trade Audit (SMETA)

BUSINESS

(i) BACKGROUND

Business Social Compliance Initiative (BSCI), which is established in 2003, provides a single point for all supply chain performance information. By sharing monitoring activities' results, therefore, members reduce effort, save money and increase consistency for buyers and suppliers. Members involved in BSCI are retail, trade, and manufacturing.

Sedex Members Ethical Trade Audit (SMETA) is a web-based system which encompasses all aspects of responsible business practice. It's designed to minimize duplication of effort in ethical trade auditing and to provide members and suppliers with an audit format that they could easily share.

(ii) THE CONTENT OF BSCI:

- Explain business benefits and opportunities that BSCI compliance brings to certified factories;
- Explain the BSCI 2.0's principle, concept and structure;
- Explain BSCI audit requirements and methodology;
- Overview the need of customers, and learn the skills and knowledge to incorporate the BSCI into daily operations to advance the performance of the business;

(iii) THE BENEFIT OF BSCI:

- A code of conduct based on internationally recognized principles, to respect human rights and address social issues in your supply chain
- Reduced cost and increased efficiency by avoiding audit duplication
- A single interactive access point to monitor performance data with a visual dashboard

(ii) THE CONTENT OF SMETA:

- Explain business benefits and opportunities that SMETA audit brings to certified factories;
- Explain the SMETA's principle, concept and structure;
- Explain SMETA audit requirements and methodology;
- Interpret the implementation of SMETA into daily operations to advance the performance of the business;
- Discussion with reference to requirement checklist

(iii) THE BENEFIT OF SMETA:

- Achieve greater visibility into your supply chain and Continuously improve your supplier relations
- Receive independent verification of your ethical compliance
- Strengthen your brand's standing in ethical compliance

Course Duration: 1 day

Methodology: Presentation, workgroup discussion and exercise

Global Security Verification (GSV)

(i) BACKGROUND

GSV (Global Security Verification) is a security programme to assist both importers and supplier to judge their security measurements based on C-TPAT (Customs-Trade Partners Against Terrorism), PIP (Partners in Protection), AEO (Authorized Economic Operator) and other international security requirements, resulting in increased safety assurance, risk control, efficiency and cost savings for all participants.

(iii) THE CONTENT OF GSV:

- Explain business benefits and opportunities that GSV verification brings to certified factories;
- Explain the GSV's principle, concept and structure;
- Explain GSV verification requirements and methodology;
- Interpret the implementation of GSV into daily operations to advance the performance of the business;
- Discussion with reference to requirement checklist

(iii) THE BENEFIT OF GSV:

- Enable importers and suppliers to mitigate risks associated with the cross-border transport of goods;
- Reduces audit fatigue by enabling suppliers to share their verification reports with various importers, allowing them to priorities resources towards learning and continuous improvement versus repeat auditing;
- Employs a consistent scoring methodology across all players that is combined with the use of automated auditor tools to provide increased audit efficiency and consistency

Course Duration: 1 day

Methodology: Presentation, workgroup discussion and exercise

ACI delivered ISO 19650 Information Management using BIM (Building Information Modelling) Effective Application & Documentation Training to Shui On Building Contractors Limited.

Accredited Certification International Limited (ACI) recently delivered **ISO19650 Information Management using (BIM) Building Information Modelling Effective Application & Documentation Training** to **Shui On Building Contractors Limited**.

ISO 19650 is a series of international standards. It defines the collaborative processes for the effective management of information throughout the delivery and operational phase of assets when BIM is being used. The objective of **ISO 19650 Effective Application & Documentation Training** was to understand the concept behind and application of the standards, the documentation structures and the advantage of documentation.

Shui On Building Contractors Limited provides construction services, with her competence in construction, design-and-build, interior fitting-out, renovation, heritage restoration and maintenance of public housing and institutional buildings. She offers her services throughout Hong Kong and the Asia-Pacific region.

瑞安集團
SHUI ON GROUP

ISO 19650 Information Management using BIM is applicable to personnel, managers & consultants who need to implement or develop BIM on projects. Accredited Certification International Limited contributed in a Drama “Be My Quarantine” for ImproKids HK

“Be My Quarantine”- a drama, is released in this summer which is organized by the ImproKids HK. 2020, that is a year that everyone suffered from a global pandemic. It forced countless celebrations and holiday gathering out of existence, even the interaction between us. ImproKids HK try to tell us that the power of companionship is strong to all of us to face any difficulties though the drama.

ImproKids HK, a theater association, contributes to engage the dramatic education for Hong Kong children and to enhance an inclusive dramatic education. They believed that drama can change life and affect others.

As a responsible corporate citizen, Accredited Certification International Limited believe that they have both a duty and a responsibility to be a force for good in our communities. In this time, they make a donation to ImproKids HK.

All the above donations been greatly assisted and arranged by the Professional and Social Services Association (PASS). Thanks for the PASS’s full support and assistance.
