

Carbon Audit–Support of Greenhouse Gas Emission Reduction

ACI, as an international standard and professional certification body, provides green related services to support local developments:

1. Provides wide range of training, verification, surveying, assessment and certification services pertaining to:

- ISO 14001 - environmental management system
- ISO 14064 - Greenhouse gas emissions and removals
- ISO/CD 26000 Social Responsibility Certification
- Energy Management and Audit
- Carbon Management System
- Sustainability Reporting

2. Publishes articles addressing issues on global warming and sustainable development

3. Organizes trainings focusing on the carbon emission reduction, environmental protection & corporate social responsibility

4 .Parallel to our external services to public, the following activities are delivered internally to save energy consumption and reduce carbon emissions within organization:

- Ongoing internal energy savings & waste reduction initiatives with target settings
- Adoption of energy efficient office equipment
- Adjust indoor temperature settings
- Promoting environmentally friendly behaviour among staff
- Switching off air-conditioning & lighting after using meeting rooms
- Turning off idle office equipment before leaving the office
- Reduce printing or use double-sided printing and encourage email communication
- Effective Use of Water
- Regular In-house Sustainability Promotion for Staff
- Recycling of computers
