

ACI Awarded **ISO 50001** Energy Management System Certificate to **Sun Fook Kong** **Construction Limited**

Sun Fook Kong Group
新 福 港 集 團

Accredited Certification International Limited (ACI) has recently awarded ISO 50001 Energy Management System (EnMS) certificate to Sun Fook Kong Construction Limited with the certification scope of 'To carry out the construction of building works'.

Under Sun Fook Kong Group, Sun Fook Kong Construction Limited provides quality of building construction and maintenance services for more than fifty years. In order to strive for continual improvement in energy efficiency and sustainable development in the long run, they have been putting great effort in reducing energy use, and therefore their energy costs and their greenhouse gas emissions and carbon emissions. The achievement of ISO 50001 certification recognizes the improvement of them.

ISO 50001 is an international standard for continuously improve energy performance through systematic approach by establishing, implementing, maintaining and improving an energy management system. It aims to provide a clear framework for promoting continuous improvement in energy management. In general, the uptake of ISO 50001 is driven by companies in response to energy cost reduction initiatives, corporate sustainability initiatives, increase market value, reduced carbon footprint, and even for future possible carbon or energy taxes.

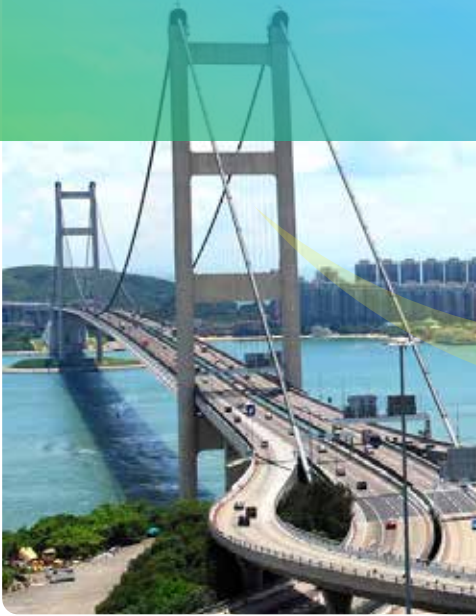

ACI devotes to deliver professional certification services to organizations from different industries. Our certificates are widely recognized as a symbol of trust and compliance. With our experienced audit team, we will continue to strive to improve organizations' Energy Management System through the audit and certification process.
