Contributing to a Sustainable Future and towards to Net Zero through ESG Reporting & ISO 14064 Verification

ESG (Environmental, Social, and Governance), Net zero and ISO 14064 are the important topics that are gaining increased attention in the business world. ESG refers to the factors that companies consider when making decisions that impact the environment, society, and their own governance practices. Net zero refers to the goal of achieving a balance between the amount of greenhouse gas emissions produced and the amount removed from the atmosphere. ISO 14064 is an international standard for quantifying and reporting greenhouse gas emission.

In the recent years, companies are increasingly being pressured to address ESG concerns and set net zero targets which require significant investments in renewable energy, energy efficiency, and carbon capture and storage technologies. This is driven by a growing recognition that businesses have a responsibility to address the impacts of their operations on the environment and society, as well as the financial risks associated with climate change.

Companies are also applying ISO 14064 verification to help them report on their environmental performance, which provides a transparent and accurate information about their greenhouse gas emissions and removals, it is an important step towards reducing their environmental impact and working towards a more sustainable future.

Overall, ESG, Net Zero and ISO 14064 are all play important roles in measuring and improving environmental performance and contributing to a more sustainable future. Should you have any interest in our ESG reporting services, carbon audit, ISO 14064 verification....etc., please do not hesitate to contact us via email: acics2@aci-limited.com or Tel: 3977 8988 or visit our website: www.aci-limited.com .

ISO 22483 Tourism and related services-Hotels-Service requirements

ISO 22483 covers a series of quality requirements for hotels and provides recommendations regarding staff, service, events, entertainment activities, safety and security, maintenance, cleanliness, supply management and guest satisfaction.

The aim of ISO 22483 is to enable hotels to offer a satisfactory guest experience, promote direct and indirect guest loyalty by enhancing and improving service quality in terms of physical facilities and various services in hotels. The standard is designed for different hotel types, business models, sizes and services, and developed to meet current customer demands and global trends.

Benefit

- Improve guest services right from reservation to checkout
- Improve cleanliness, hygiene and food safety
- Help to offer structured and planned entertainment activities for the guests
- Promote risk and accident prevention in the hotel.
- Improve safety and security of guests, staff and premises
- Improve overall experience of the guests and their satisfaction level
- Increase business sustainability of hotels

We highly recommend your organization to involve these ISO Standards on your business development path. Please do not hesitate to contact us for more details via email: acics2@aci-limited.com or Tel: 3977 8988 or visit our website: www.aci-limited.com .

ACI new online platform for "Training Certificate Verification"

ACI aims to provide individuals or companies comprehensive trainings covering different ISO Management System and allow our delegates fully understand the course content so that they are able to apply what they have learnt in the real situation practically.

In order to ensure the credibility, now individuals may verify our issued training certificates on ACI's website and ensure that the certificate holder has actually undergone the training and obtained the relevant skills and knowledge. This helps to maintain the credibility of the training program and the certificate.

Furthermore, it also helps to detect fraudulent certificates and prevent people from using fake certificates to gain employment or other benefits. We hope that this new search function can help individuals demonstrate their skills and qualifications to potential employers, which can facilitate career advancement opportunities.

ACI newly launched CQI and IRCA ISO 27001:2022 Information Security Management System (ISMS) Lead Auditor Training Courses for your Employee Training Program

ACI is pleased to announce that our new CQI and IRCA ISO 27001:2022 Lead Auditor training courses has recently launched for auditors and professionals who are responsible for conducting audits of an organization's ISMS. It can enrich their ISO 27001 auditing skills and techniques, and they may able to claim CPD hours for their membership at professional bodies. Recently many organizations also include this training course under their Employee Training Program.

The CQI and IRCA ISO 27001:2022 Lead Auditor courses are designed to provide a comprehensive understanding of the requirements of the standard and guidance on how to conduct an effective audit. The cover topics such as understanding the structure of the standard, the risk management process, and the new requirements for leadership and context of the organization…etc..

By completing these CQI and IRCA-approved Lead Auditor training courses, auditors and professionals can gain a deeper understanding of the standard and how to effectively assess and audit an organization's information security management system. They should also able to demonstrate their competence in auditing ISMS based on the ISO 27001 standard. And help organizations ensure that their sensitive information is protected and that they are in compliance with the latest international standards for information security management.

This newly launched CQI and IRCA training course is an important step towards helping organizations stay up-to-date with the latest standards and best practices for information security management. Should you have any interest on this course, please feel free to contact our training department via email: training@aci-limited.com or Tel: 3977 8988 or visit our website: www.aci-limited.com .

Supply Chain Security Management System ISO 28000:2022 Transition

ISO has released the ISO 28000:2022 in last year, which replaces the old version from 2007. This International Standard specifies requirements for a security management system, including aspects relevant to the supply chain. It is applicable to all types and sizes of organizations (e.g., commercial enterprises, government or other public agencies and non-profit organizations) which intend to establish, implement, maintain and improve a security management system.

This second edition of ISO 28000 cancelled and replaced the first edition from 2007. The primary objective of the revision was to align the standard to the Harmonized Structure (HS) laid out in the ISO Directives Annex SL Appendix 2 for ISO managements system standards in its latest version.

This alignment makes the standard fully integratable and easy to use together with other managements systems standards like ISO 9001 on quality management or ISO 22301 for business continuity management. Aside of the alignment with the HS the main changes are:

• recommendations on principles have been added in clause 4 to provide for a better coordination with ISO 31000

• recommendations have been added in clause 8 for better consistency with ISO 22301 facilitating integration of requirements and recommendations of both standards into one holistic integrated and sustainable management system of the user. It now includes 1) security strategies, procedures, processes and treatments and 2) security plans.

If you are working in the supply chain industry including production, storage, distribution, transportation of goods (road, rail, sea and air), etc., we highly recommend your organization to apply ISO 28000 Certification as it can contribute directly to the business capability and credibility of an organization and to its resilience. Please do not hesitate to contact us via email: acics2@aci-limited.com or Tel: 3977 8988 or visit our website: www.aci-limited.com .

Building Value Through
ISO 20400 Sustainability Procurement
A standard In Relationship with
ISO 26000, ISO 14064 & ISO 50001

In order to deliver sustainable benefits, be more competitive and enhance the contribution of organizational procurement to organizational objectives, as well as prevent financial, environmental and reputational risk, many organizations adapt ISO 20400 verification recently.

ISO 20400 – "Guidelines for Sustainable Procurement" was developed in response to the increasing recognition of the importance of sustainable procurement practices. Sustainable procurement involves considering the environmental, social, and economic impacts of the goods and services being procured, as well as the impacts of the procurement process itself.

If your organization have been obtaining "ISO 26000 – Social Responsibility and Sustainable Development", "ISO 14064 – Greenhouse Gas Emissions Management System" or "ISO 50001 – Energy Management System", they may also consider attaining ISO 20400 as they are all interrelated and can be used in conjunction with each other.

ISO 20400 can be used to guide sustainable procurement practices that consider the environmental and social impacts of the goods and services being procured, while ISO 14064 can be used to measure and report on the greenhouse gas emissions associated with those goods and services. ISO 50001 can be used to manage energy consumption and reduce associated GHG emissions, while ISO 26000 can be used to ensure that social responsibility considerations are integrated into an organization's energy management practices.

The relationship among these standards is one of mutual reinforcement, where the adoption and implementation of one standard can support and enhance the adoption and implementation of others, leading to more sustainable and socially responsible practices.

Should you have any interest in our ISO Certification, please feel free to contact us via email: acics2@aci-limited.com or Tel: 3977 8988 or visit our website: www.aci-limited.com.

New EU legislation -
Corporate Sustainability Reporting Directive (CSRD)

The Corporate Sustainability Reporting Directive (CSRD) is the new EU legislation requiring all large companies to publish regular reports on their environmental and social impact activities. It helps investors, consumers, policymakers, and other stakeholders evaluate large companies' non-financial performance.

It is similar to our ESG (Environmental, Social, and Governance) reporting. They both provide important information about a company's ESG performance, policies, and practices. It is an important tool for promoting transparency and accountability, and for demonstrating a company's commitment to sustainability and social responsibility.

The CSRD would represent a significant step forward in promoting sustainability and social responsibility reporting in the EU. It can also be used to track progress towards ESG goals and to demonstrate a company's commitment to ESG principles.

ESG factors are useful for evaluating a company's long-term sustainability and its ability to manage risks and opportunities related to sustainability and social responsibility. Should you have any interest in our ESG reporting services, please do not hesitate to contact us via email: acics2@aci-limited.com or Tel: 3977 8988 or visit our website: www.aci-limited.com .

Fire Safety Training on
Fire Hazard Analysis and Fire Risk Assessment

Fire hazards are important to understand and address because they present a significant risk to life and the environment. It can cause property damage, injuries, and even fatalities, and can have a devastating impact on businesses, homes, and communities. It may occur in a variety of settings, including workplaces, homes, and public spaces.

ACI is now providing Fire Safety training on Fire Hazard Analysis & Fire Risk Assessment, which includes the key contents of fire hazard identification and different approaches to fire risk assessment, fire prevention and mitigation action, emergency plan, etc. The training is important to provide individuals with the knowledge and skills they need to prevent fires from occurring, identify potential hazards, and respond appropriately.

Understanding and addressing fire hazards is essential for promoting safety and minimizing the risk of fires and their associated impacts, and ensure that individuals are better prepared to handle fire emergencies. We highly recommend your employees to register the course for acquiring the latest knowledge on hazards analysis and different approaches to fire risk assessment.

Should you have any enquiry on our training courses, please feel free to contact us via email: acics2@aci-limited.com or Tel: 3977 8938 or visit our website: https://www.aci-limited.com/en/training/.

CQI and IRCA Lead Auditor Training Courses implemented SARAS online examination

The English-language examinations for lead auditor courses administered by the Chartered Quality Institute (CQI) and International Register of Certificated Auditors (IRCA) using their online learning system instead of the paper-based examination. All learners enrolling on courses for IRCA Lead Auditors courses, i.e ISO 9001, ISO 14001, ISO 45001 & ISO 27001 will require to take an online exam within 30 days after their completion of training.

The new approach protects the security of the examination and increase the integrity of the whole CQI-IRCA Lead Auditor training system, it uses remote online invigilation during the examination period, and provides delegates with the flexibility to attempt the exam at a time and place of their choosing once they have completed their training course.

Should you have any enquiry or interest in our CQI and IRCA Lead Auditor training courses, please feel free to contact our training department via email: training@aci-limited.com or Tel: 3977 8983 or visit our website: https://www.aci-limited.com/en/training/.

ACI awarded ISO 27001:2013 Certification to Charter Link Logistics Limited

ACI recently presented ISO 27001:2013 Certification to Charter Link Logistics Limited with the scope of "Provision of Logistics Services". This is in additional to their ISO 9001 accreditation (quality management) that CTL has attained earlier.

 Charter Link Logistics (CTL) is the market leader in LCL consolidation, a key segment of the ocean transport industry. Founded in 1998, it is one of the few Hong Kong-based logistics companies that maintain a global leadership position in their line of business. Charter Link takes progressive steps to invest in strategic locations abroad, operates 47 international locations with over 1,500 staff and supported by over 200 agent partners worldwide.

As businesses deal with increasing volume of data, information security has never been more significant. ISO 27001 Certification is widely considered to be the 'gold standard' of information security. ISO 27001-certified provides a global recognition to Charter Link's systematic approach of safeguarding system data to the highest quality standard.

ISO 27001 certification can benefit organizations that wish to improve business processes in the field of information security, privacy, and securing its information assets. For further information, please feel free to contact ACI at acics2@aci-limited.com, call +(852) 3977 8988, or visit our website: www.aci-limited.com .

ACI presents ISO 9001 and ISO 14001 Certificates to Chun Wo Group Companies

ACI is pleased to present the ISO 9001 and ISO 14001 Certificates to more subsidiaries of Chun Wo Group including Vasteam Construction Limited, Bloom Team Building Construction Company Limited, Core Limited and Chun Wo Railway Engineering Limited.

Chun Wo Group is a Hong Kong-based construction and engineering company that provides a range of services, including building construction, civil engineering, electrical and mechanical engineering, and property development. The company has implemented an Integrated Management System (IMS) that complies with ISO 9001, ISO 14001, and ISO 45001 standards.

ISO 9001 is a standard that specifies requirements for a quality management system. Chun Wo Group has implemented this standard to ensure that their construction and engineering services consistently meet customer requirements and comply with relevant regulations.

ISO 14001 is a standard that specifies requirements for an environmental management system. This standard allows Chun Wo Group to minimize their impact on the environment and comply with relevant environmental regulations.

By implementing the ISO standards, it helps the company to improve their business processes, reduce risks, and enhance their reputation among stakeholders. For more information about our ISO Certification, please do not hesitate to contact us via email: acics2@aci-limited.com or Tel: 3977 8938 or visit our website: www.aci-limited.com.

ACI is pleased to provide
Carbon Emission Verification services to
O-Bank Co. Ltd

ACI recently provided the Carbon Emission Verification in accordance with ISO 14064-1:2018 Greenhouse Gas (GHG) Standard to O-Bank Co. Ltd, Hong Kong Branch.

O-Bank Co., Ltd. is a commercial bank headquartered in Taiwan. It was formerly known as Industrial Bank of Taiwan and changed its name to O-Bank in 2017. The bank offers a range of financial services, including personal banking, corporate banking, and wealth management. By verifying carbon emissions, it allows O-Bank Hong Kong Office to demonstrate their commitment to sustainability and reduce their impact on the environment.
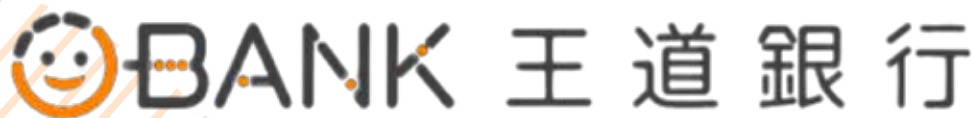

Carbon emission verification is becoming increasingly important as governments, organizations, and consumers become more aware of the impact of greenhouse gas emissions on the environment and climate change. The verification process involves collecting data on the GHG emissions from various sources, such as power generation, transportation, and manufacturing processes. This data is then analyzed and verified by us to ensure the accuracy and completeness of the emissions data.

Once the verification process is complete, the organization may receive a verification statement to demonstrate its compliance with regulatory requirements or its commitment to reducing its carbon footprint.

Should you have any enquiry or interest in our Carbon Audit or ISO 14064 Verification Services or ESG reporting, please feel free to contact us at acics2@aci-limited.com, call +(852) 3977 8988, or visit our website: www.aci-limited.com.

ACI presents ISO 9001:2015 Certificates to Aeronautical Meteorological Centre and Meteorological Monitoring Centre of Macau Meteorological & Geophysical Bureau

ACI recently presents the ISO 9001:2015 Certificates to Macau Meteorological & Geophysical Bureau – Aeronautical Meteorological Centre with its scope of "Provision of aviation weather services for international air navigation" and to Meteorological Monitoring Centre with its scope of "Provision of issuing services for tropical cyclone signal and storm surge warning".

Macau Meteorological and Geophysical Bureau (hereinafter referred to as SMG) has been in service for more than seventy years since its official establishment in 1952. Besides its primary responsibilities of the weather monitoring, analysis and forecast, SMG also issues different kinds of meteorological warnings. In addition, SMG is responsible for the activities relating to aviation meteorology, climate as well as the activities against the climate change.

By implementing ISO 9001 standards, it helps both two centers to manage and improve its quality management system. This can lead to increased customer satisfaction and loyalty. It also helps streamline processes and reduce waste, resulting in increased efficiency and productivity.   Furthermore, ISO 9001 also allows them to have a better risk management by identifying and managing risks, which can reduce the likelihood of costly errors and improve decision-making.

We highly recommend your companies to apply ISO 9001 Certification as it is generally considered to be a good framework for companies to follow and it's a widely recognized standard. Should you have any interest in our ISO Certification, please do not hesitate to contact us via email: acics2@aci-limited.com or Tel: 3988 8988 or visit our website: www.aci-limited.com .

ACI devote to fostering green living – Established Online survey and E-training materialsfor reducing paper usage

Customer Satisfaction Survey is one of our services provided to our clients. Our enumerator used to collect the data by using physical paper forms or questionnaires. In order to protect our environment and reduce paper waster, ACI established an online survey platform for our survey services and aim to be more eco-friendly compared to traditional paper surveys.

Our online survey platform would help on reducing paper waster and energy consumption as it eliminates the need for paper questionnaires, which significantly reduces paper usage. It also provides a more convenient and efficient way to collect information.

Besides, we are promoting all training materials delivered in e-copy, the advantages of online surveys and e-training material being paperless are numerous, including cost savings, environmental benefits, ease of use, and flexibility in data collection and analysis. ACI will continue to contribute on improving our environment and fostering a green living.
