Joined the “Green Hong Kong Carbon Audit Campaign” and Make a Sustainable Impact

ACI is pleased to continue participating the “Green Hong Kong • Carbon Audit” Campaign this year and to be “Carbon Audit • Green Partner”.

By participating in this initiative, we can play an active role in reducing carbon emissions and promoting sustainable practices. Joining the campaign not only benefits the environment but also helps foster a more resilient and livable Hong Kong for generations to come.

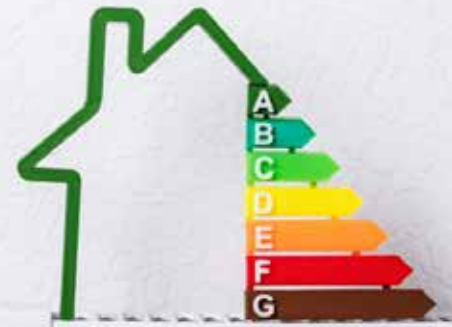

At the heart of the Green Hong Kong Carbon Audit Campaign lies the concept of the carbon audit. A carbon audit is a process of assessing and measuring the amount of greenhouse gas emissions produced by various activities and operations. By conducting a carbon audit, individuals and organizations gain invaluable insights into their environmental impact, paving the way for informed decisions and targeted actions towards emission reduction.

Apart from ISO Certification, ACI also provide Carbon Audit Services to our customers. We highly recommend individuals and organizations conducting a carbon audit to help on implementing sustainable practices. At the heart of the Green Hong Kong Carbon Audit Campaign lies the concept of the carbon audit. A carbon audit is a process of assessing and measuring the amount of greenhouse gas emissions produced by various activities and operations. By conducting a carbon audit, individuals and organizations gain invaluable insights into their environmental impact, paving the way for informed decisions and targeted actions towards emission reduction.

Apart from ISO Certification, ACI also provide Carbon Audit Services to our customers. We highly recommend individuals and organizations conducting a carbon audit to help on implementing sustainable practices.

If you are interested with our Carbon Audit services, please do not hesitate to contact us via email: acics2@aci-limited.com or Tel: 3977 8988 or visit our website: www.aci-limited.com.

ACI conducted Energy Audit to Dragon Centre Management Limited and Chevalier Commercial Centre

The electricity consumption in Hong Kong is mainly contributed by buildings in which commercial buildings consume a large portion of electricity. As such, the Government enacted the Building Energy Efficiency Ordinance (BEEO) in order to regulate the energy efficiency of key building services installations inside prescribed buildings.

After implementation of the BEEO, enhancement of the building energy efficiency in Hong Kong is expected. Not only does it save electricity bill, but it also helps reduce greenhouse gas emissions and improve air quality in order to bring about a more pleasant living environment.

The owner of a commercial building or the commercial portion of a composite building (irrespective of newly constructed or existing one), every 10 years, is required to engage a Registered Energy Assessor to carry out

energy audit for 4 key types of central building services installation, namely, air-conditioning installation, electrical installation, lighting installation as well as lift and escalator installation, in accordance with the latest edition of the EAC.

ACI recently conducted energy audit to Dragon Centre Management Limited and Chevalier Commercial Centre. It contributes to an organization's environmental sustainability goals and go beyond energy consumption analysis. If you would like to have a smooth and reliable energy audit services, please do not hesitate to contact us for more information. We can be reached via email: acics2@aci-limited.com or Tel: 3977 8988 or visit our website: www.aci-limited.com .

Embracing the ESG Trend: A Pathway to Sustainable and Responsible Business

In recent years, Environmental, Social, and Governance (ESG) considerations have emerged as a crucial factor for businesses worldwide. The ESG trend represents a fundamental shift in how organizations approach sustainability and responsible business practices. ESG encompasses a broad range of factors, including a company's impact on the environment, its relationships with stakeholders, and its corporate governance structure.

Integrating ESG principles into business strategies requires a comprehensive and proactive approach. By integrating environmental, social, and governance considerations into the operations, organizations can enhance resilience, mitigate risks, foster innovation, attract top talent, and gain a competitive advantage.

ACI recently applied our training courses for the Pilot Green and Sustainable Finance Capacity Building Support Scheme, which they are 1) Corporation Level Greenhouse Gas (GHG) Emissions Quantification and Reporting; 2) Corporation Level Greenhouse Gas (GHG) Emissions Accounting and Verification; 3) Environmental, Social and Governance (ESG) Introduction.

This scheme aims to support talent development in GSF by providing subsidies to market practitioners as well as prospective practitioners in taking up relevant training and acquiring relevant professional qualifications. The Scheme will run for a pilot period of three years and is administered by the Secretariat of the Centre for Green and Sustainable Finance (Secretariat).

ACI will continue to demonstrate our commitment to sustainable development and aim to make a meaningful and positive impact on the environment, society, and governance practices.

Implementation of the remaining 4 elements of Part 3 of Appendix 4 of the Factories and Industrial Undertakings (Safety Management) Regulations

The Factories and Industrial Undertakings (Safety Management) Regulation made by the Commissioner for Labour was approved by the Legislative Council on 24 November 1999 and came into effect on 1 April 2002. It provides for the introduction of a safety management system in selected industrial undertakings.

To facilitate proprietors and contractors to implement a safety management system applicable to Hong Kong, the Regulation provides for 14 process elements. Initially, contractors or proprietors in relation to construction sites, shipyards, factories and other designated industrial undertakings are required to implement the first 10 of the 14 process elements of the safety management system, and to carry out safety audits of their safety management system.

For the rest of the 4 process elements are not yet implemented, which they are 1) Evaluation of job related hazards or potential hazards and development of safety procedures; 2) Promotion, development and maintenance of safety and health awareness in a workplace; 3) A programme for accident control and elimination of hazards before exposing workers to any adverse work environment; 4) A programme to protect workers from occupational health hazards.

The purpose of the phased implementation of the regulations is to familiarize relevant industries with the safety management system and prepare for the implementation of the remaining four elements. The labour department have conducted multiple reviews with the industry, and most of the responses from the industry have been positive. There is no objection to the implementation of the remaining 4 elements. So we may foresee the future safety audit would need to be included all 14 process elements.

ACI is experienced on the F&IU Safety Audits and we have our own registered safety auditors and registered safety officers. Should you have any interest in our safety audits, please feel free to contact us via email: acics2@aci-limited.com or Tel: 3977 8988 or visit our website: www.aci-limited.com.

ACI delivered ISO 9001:2015 and ISO 14001:2015 Awareness Training to Civil Engineering and Development Department

ACI recently delivered ISO 9001:2015 and ISO 14001:2015 Awareness Training to Civil Engineering and Development Department.

ISO 9001 and ISO 14001 awareness training plays a crucial role in equipping employees with the necessary understanding and skills to contribute to the organization's pursuit of excellence in quality and environmental performance.

Throughout our awareness training, it's not only allowed participants to build a foundational understanding of the standards, objectives, and key principles. It also allowed participants gaining insights into the importance of their roles in achieving quality objectives, meeting customer expectations, and contributing to environmental sustainability.

ISO awareness training empowers organizations to thrive in today's competitive landscape while making a positive impact on both their customers and the environment. Should you have any interest in our ISO trainings, please feel free to contact us via email: training@aci-limited.com or Tel: 3977 8988 or visit our website: <https://www.aci-limited.com/en/training/>.

ACI delivered Six Sigma Lean Green Belt (LSSGB) in Healthcare Training to New Territories East Cluster (NTEC) – Hospital Authority

新界東醫院聯網
NEW TERRITORIES
EAST CLUSTER

Through LSSGB training, it helps NTEC create a culture of continuous improvement, enhance patient safety, and achieve operational excellence. We highly recommend healthcare organization to join the LSSGB trainings as it would be a step toward delivering efficient, high-quality care, and ultimately improving patient experiences and outcomes.

In the healthcare industry, delivering high-quality care while maximizing efficiency is of utmost importance. Healthcare organizations are constantly seeking ways to improve processes, reduce waste, and enhance patient outcomes. One powerful methodology that has gained significant recognition in healthcare is Six Sigma Lean.

ACI recently delivered Six Sigma Lean Green Belt (LSSGB) in Healthcare Training to New Territories East Cluster (NTEC) – Hospital Authority with Project Coaching. LSSGB training provides healthcare professionals with a comprehensive understanding of these methodologies, including their principles, tools, and application in healthcare settings. Participants learn how to define problems, measure process performance, analyze root causes, implement improvements, and control processes to sustain positive change.

Please do not hesitate to contact us for more information. We can be reached via email: training@aci-limited.com or Tel: 3977 8988 or visit our website: <https://www.aci-limited.com/en/training/>.

ACI presents ISO 37001:2016 Certificate to Architectural Services Department (ASD)

ACI is pleased to present ISO 37001:2016 Anti Bribery Management System Certificate to Architectural Services Department (ASD) with the scope of "Plan, design, procure, maintain facilities and advise professionally".

建築署
Architectural Services
Department

In today's global business landscape, maintaining ethical practices and preventing corruption is of paramount importance. The achievement of ISO 37001 certification by ASD marks a significant milestone, demonstrating its commitment to upholding the highest standards of anti-bribery management systems.

By achieving ISO 37001 certification, it not only helps to recognize ASD's dedication to transparency, integrity, and ethical conduct, but also sets a new standard for ethical business practices and reinforces its position as a trusted and responsible organization.

ISO 37001 certification is a powerful tool for organizations committed to maintaining the highest ethical standards and preventing bribery and corruption. If you have any interest in ISO 37001 Certification or our other ISO Certification, please feel free to contact us via email: acics2@aci-limited.com or Tel: 3977 8988 or visit our website: www.aci-limited.com.

ACI presents ISO 9001:2015, ISO 14001:2015 and ISO 45001:2018 Certificates to CR Engineering Company Limited

ACI recently presents the ISO 9001:2015, ISO 14001:2015 and ISO 45001:2018 Certificates to CR Engineering Company Limited with the scope of "Design and construction of large diameter bored piles, pipe piles, sheet piles, grout curtains, socketed steel H-piles, driven H-piles, pile caps, excavation and lateral support (ELS), site formation and ground investigation field works".

CR Engineering Co. Ltd is the subsidiary of CR Construction Group Holdings Limited (Stock Code: 01582.HK), who is the leading building contractors in Hong Kong with over 50 years of experience. It principally acts as a main contractor in building construction works and RMAA works projects in Hong Kong.

In today's competitive business landscape, organizations strive to enhance their operational efficiency, meet regulatory requirements, and demonstrate commitment to quality, environmental sustainability, and occupational health and safety. ISO 9001, ISO 14001, and ISO 45001 certifications offer a roadmap for achieving these goals. By attaining these Certifications, it helps CR Engineering to demonstrate their dedication to best practices, gain a competitive advantage, and build trust with stakeholders. Embracing ISO standards not only drives business excellence but also contributes to a more sustainable and socially responsible future.

Should you have any interests of our ISO Certification, please feel free to contact us via email: acics2@aci-limited.com or Tel: 3977 8988 and visit our website: www.aci-limited.com

ACI presents ISO 9001:2015, ISO 14001:2015 & ISO 45001:2018 Certificates to MTR Corporation Ltd – Investment Property Department & Property Management Department

ACI recently presents ISO 9001:2015, ISO 14001:2015 & ISO 45001:2018 Certificates to MTR Corporation Ltd – Investment Property Department & Property Management Department with the scope of “Design and Provision of Property and Facility Management Services”.

The Mass Transit Railway (MTR) Corporation, a leading public transportation provider in Hong Kong, has demonstrated its commitment to excellence by being awarded the Quality, Environment, and Safety (QES) ISO Certification. This prestigious certification acknowledges MTR's dedication to maintaining the highest standards of quality, environmental stewardship, and safety across its operations.

The QES ISO Certification is a testament to an organization's unwavering commitment to quality, environmental sustainability, and occupational health and safety. It establishes a comprehensive framework that helps organizations streamline processes, improve efficiency, reduce environmental impact, and prioritize the safety and well-being of employees and passengers. By achieving this certification, MTR has demonstrated its commitment to excellence in all aspects of its operations.

We highly recommend all organization to obtain ISO Certification as ISO 9001 Quality Management System, ISO 14001 Environmental Management System, ISO 45001 Occupational Health and Safety Management System...etc.. Should you would like to have more information about our ISO Certification, please do not hesitate to contact us via email: acics2@aci-limited.com or Tel: 3977 8988 or visit our website: www.aci-limited.com .

ACI presents ISO 9001:2015, ISO 14001:2015 and ISO 45001:2018 Certificates to Star Group – Star Properties Management (HK) Ltd and Star Security Services Co. Ltd

ACI recently presents ISO 9001:2015, ISO 14001:2015 and ISO 45001:2018 Certificates to Star Properties Management (HK) Ltd and Star Security Services Co. Ltd.

Star Properties and Star Security operates as a subsidiary of Star Group, which is known for its portfolio of companies in different industries. With its headquarters and operations spanning multiple regions, Star Security has built a solid foundation as a trusted security service provider and Star Properties Management providing comprehensive and user experience-based property management services to the customers.

ISO 9001, ISO 14001 and ISO 45001 Certifications offer numerous benefits to organizations committed to excellence in quality, environmental sustainability, and occupational health and safety. These certifications provide a structured framework for Star Properties and Star Security to improve customer satisfaction, streamline operations, achieve regulatory compliance, enhance resource efficiency, and prioritize employee well-being.

We highly recommend your organizations to obtain ISO 9001, ISO 14001 and ISO 45001 Certifications as it brings a range of benefits that can positively impact your operations, reputation, and overall success. Please do not hesitate to contact us for more information via email: acics2@aci-limited.com or Tel: 3977 8988 or visit our website: www.aci-limited.com.

Leading the Way Towards Energy Efficiency: The Energy Saving Charter 2023 and 4T Charter

In order to recognize the importance of energy conservation, ACI have adopted initiatives and charters to promote responsible energy use. Two notable examples are the Energy Saving Charter 2023 and the 4T Charter, both of which aim to drive energy efficiency and inspire positive change. By committing to these charters, we contribute to a greener and more sustainable future.

By signing up for the Energy Saving Charter 2023, we commit to the following 4 criteria including 1) Energy Audits and Efficiency Upgrades; 2) Behavioral Changes; 3) Renewable Energy Adoption and 4) Public Awareness and Education.

The 4T Charter focuses on four key principles: Turn off, Tune up, Transform, and Teach. By embracing these principles, we can make significant strides in energy conservation and sustainability.

ACI will continue to work together to create a greener and more sustainable world for generations to come.
